

FSC HOLDS 1ST TASKFORCE MEETING TO PROMOTE ROLE OF INSURERS IN HEALTH CARE-RELATED SERVICES

The FSC held the first taskforce meeting on promoting the role of insurance companies in providing health care-related services with the relevant ministry and industry officials on February 4.

At the meeting, officials discussed major health care industry trends in overseas markets and the domestic health care market environment for insurance companies.

To boost the effectiveness in operating the taskforce, the FSC will separately operate an advisory group and a working group to draw up and search for policy tasks. While working to accelerate a data convergence between the health care and financial industries, the taskforce will explore diverse areas to make improvements, such as expanding the use of digital health devices for insurance companies.
